

# FIVE WAYS TO FORTIFY YOUR HOUSE, INSIDE-OUT

## 01. FENCE IT REAL GOOD

Fencing your property brings an additional layer of defense to your house. Choose a fence that is difficult to climb, has some horizontal rails and most importantly, spiked at the top.

## 02. LET IT SHINE

Do not underestimate simple safety tips such as security lights. They are triggered with motion detectors and would make any intruder the spotlight, right before he enters the scene.

## 03. PLANT IT UP

Make your entries difficult to access, specially your windows. In addition to double glazing your windows, add some lovable cactus, thorny roses and bushes to fend them off.

## 04. DEADBOLTS

Reinforce your door locks by changing your standard bolts to deadbolts. They make forceful entrances using standard knives or crowbars nearly impossible to break-in.

## 05. SAFE ROOM

Select a safe room in your home and fortify the space so that you and your loved ones will be protected during a home invasion. Don't forget to add communication equipment so you can alert the police.
